

Installation Instructions

Super Model — Double, Queen & King

1. Remove mattress—set it aside
2. Open the 2 boxes stamped "BOTTOM".
3. Remove rolled pads and lift (still wrapped) onto boxspring. Remove protective bag. Place start of roll at head (or foot) of bed. You can feel the magnet side on the top of roll and see the labels showing "This Side Up" Start unrolling pad from the under side of the roll.
4. Repeat steps for the other side of bed.
5. Open boxes stamped "TOP".
6. Remove rolled pads and lift (still wrapped) on top of the bottom layer. Remove protective bag.
7. Place at head (or foot) of bed. Remove tape and unroll a few inches— Lining up top edge and side edges evenly with the bottom layer. The magnet *side is on the bottom* of this pad and the 2 layers will snap together as you unroll. Continue all the way down.
8. If they don't line up—roll back up and realign again.
9. Repeat for other side of bed.
10. Put mattress on top of Top/Booster Sleep Pad Layer.

Storage / Moving Instructions

If you need to move the Magnetico Sleep Pad at a later date, it is very important to follow these instructions:

1. Roll the top layer(s) with the label “This Side Up” on the **inside** of the roll. You will feel the magnets on the outside of the roll.
2. Flip the bottom layer(s) over. Now roll the bottom layer(s) with the label “This Side Up” on the **outside** of the roll. You will feel the magnets on the outside of the roll.

If the sleep pads are not rolled up with the magnet side on the outside you will damage the sleep pad beyond repair. If it is being returned under our Satisfaction Guarantee and the sleep pad is damaged by not correctly rolling it, then no refund will be given.

Do not wash or dry clean covers. Fabric may shrink. Spot clean only.

IMPORTANT

Due to the strong magnetic field:

- **Computers or other electronic data storage devices should be placed at least 3 feet away from the sides and ends of your Magnetico Sleep Pad.**
- **Avoid TV (old CRT style) placement in the room directly below your bed. The magnetic field can affect your color. LCD and plasma screens will not be affected.**
